EDUCATION

SRM Institute of Science and Technology, Chennai 2023 – Present

B.Tech in Computer Science and Engineering | GPA: 6.39/10 | 6th Semester

TECHNICAL SKILLS

Languages: SQL, Python, Java, C, JavaScript, HTML, CSS,

Frameworks & Libraries: React.js, Django, Flask, TensorFlow, Scikit-learn, OpenCV, pandas, BeautifulSoup

Databases: MySQL, PostgreSQL, MongoDB

Tools & Platforms: Git, GitHub, Docker, REST APIs, Linux

Concepts: Data Structures & Algorithms, OOP, Relational Modeling, Machine Learning, Computer Vision

PROJECTS

Sales Management System *Academic Project*

- Designed and implemented a relational database system to manage end-to-end sales operations for a manufacturing business. Modeled entities including products (sample ID, texture, thickness, pricing), employees, customers, and order transactions using normalized schema design. Wrote complex SQL queries, joins, constraints, and triggers to support revenue tracking, inventory flow analysis, and regional sales reporting. Demonstrated strong understanding of relational data modeling and structured query optimization.

Stock Market Real-Time Web Scraper & Analyzer *Python | pandas | BeautifulSoup | Selenium*

- Built a Python-based pipeline to scrape and process live stock market data, capturing real-time price movements and market trends. Implemented data cleaning and preprocessing using pandas; computed basic technical indicators for comparative analysis across equities. Designed the system to handle dynamic web content and automated periodic data extraction for continuous monitoring.

Real-Time Object Detection using Camera Feed *Python | OpenCV | TensorFlow | YOLO*

- Developed a real-time object detection application using a live camera feed, integrating pre-trained YOLO/SSD models via TensorFlow and OpenCV. Implemented bounding box rendering and multi-class label classification with real-time frame processing at low latency. Demonstrated applied skills in computer vision, ML model integration, and real-time data processing pipelines.

AI Conversational Assistant (AI Bot) *Python | NLP | OpenAI API Integration*

- Built a task-based AI assistant integrating large language model APIs with a custom prompt-handling layer to deliver context-aware responses. Designed conversation flow logic and implemented basic NLP preprocessing to handle varied user intents and improve response relevance.

CERTIFICATIONS

- Responsible AI: Applying AI Principles with Google Cloud — Google (Badge)
- Introduction to Responsible AI / Large Language Models / Generative AI — Google (Badges)
- AWS Academy Graduate — Cloud Security Foundations & Cloud Developing (Training Badges)
- Microsoft Student Technical Training — Microsoft
- SQL (Advanced) — HackerRank

ACHIEVEMENTS & COMPETITIVE PROGRAMMING

- Smart India Hackathon (SIH) — Internal Hackathon Finalist; shortlisted among top teams at SRM for national-level problem statements.
- HackerRank 5-Star Gold Badge in C, C++, SQL, Python, and Java — demonstrated proficiency across multiple programming domains.
- CodeChef — 167+ problems solved; consistent practice across data structures and algorithmic challenges.
- LeetCode — 25+ database (SQL) problems solved; focused on query optimization and relational problem-solving.

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

Technical Head — Directorate of Alumni Affairs, SRMSIT 2024

- Led the technical operations team for a university-wide alumni engagement body; managed digital infrastructure and coordinated technical initiatives for alumni events.

Finance Committee Member — Directorate of Alumni Affairs, SRMSIT 2024

- Contributed to financial planning and budget management for alumni events and society operations.

Member — IEEE Technical Society, SRMSIT 2022 – Present

- Active member of the IEEE Student Branch; participated in technical workshops, seminars, and collaborative engineering projects.
